

TRAINING COURSE

LMS Imagine.Lab Amesim BASIC Training 1 DAY

This training course introduces new users of LMS Imagine.Lab Amesim to the structure and the use of the software as well as the modelling and simulation process. The course forms the basis for all the LMS Imagine.Lab Amesim application-oriented training courses, and is a pre-requisite to access further courses.

Course Content:

Presentation of LMS Imagine.Lab Amesim
Positioning
Behing LMS Amesim
The applications
The LMS Amesim environment
Building the first model in LMS Amesim, from sketch up to simulation.
Important concepts: multiport approach, casuality rules, sign convention
Standard Libraries: mechanics and control
Basic menus and options overview

Plotting capabilities
Batch Runs
Parameter Settings
Simulation Options

Who should attend:

Techinal Specialists or Engineers who start using LMS Imagine Lab Amesim and/or AmeRun. Engineering and or Scientific background is required, as well as basic computer knowledge.
